

Saqib Ahmed K

Software Engineer • AI/ML Developer • Data Analyst • Full-Stack Developer
Bangalore, India | saqibak045@gmail.com | +91 86606 79775 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Third-year CS Engineering student with hands-on experience across AI/ML, full-stack development, data engineering, and business intelligence. Built 8+ end-to-end projects spanning LLM-powered apps (LangChain/RAG), real-time distributed pipelines (PySpark on Ubuntu), full-stack systems (FastAPI + MongoDB + React.js), Power BI dashboards on 40,000+ record datasets, and deep reinforcement learning visualizers. Deployed on AWS. Interned coordinating AI programs for 100+ professionals. Finalist in 4 national/international hackathons. Vice President & Tech Lead, FACE Club at REVA University.

SKILLS

Languages: Python, Java, JavaScript, C++

AI / ML: LangChain, RAG pipelines, Scikit-learn, Pandas, NumPy, Random Forest, DQN (Deep Q-Network), A* Search, OpenCV, Computer Vision

Data Engineering: PySpark, real-time streaming, distributed computing — IBM Spark Fundamentals I & II certified

Full-Stack: FastAPI (Uvicorn), Flask, React.js, Vite, Tailwind CSS, REST APIs, JWT, OAuth2Bearer, HTML/CSS

Databases: MySQL, MongoDB, SQL — applied across 5+ projects; familiar with MariaDB/PostgreSQL

Data & BI: Power BI (DAX, dashboards, data modeling), Advanced Excel, KPI reporting, data cleaning & visualization

DevOps & Tools: Git, GitHub, Linux/Ubuntu, AWS (deployment), Docker (familiar), Jupyter Notebook, n8n automation

EXPERIENCE

Junior Intern — REVA Academy for Corporate Excellence (RACE)

May 2025 – September 2025 | Bangalore, India

- Coordinated AI/ML training programs for 100+ working professionals across multiple cohorts.
- Analyzed LMS engagement metrics — tracked completion rates, assessment scores, and participation KPIs; prepared weekly and monthly performance reports for program managers.
- Managed platform operations including content uploads, session recordings, and user access on a Linux-based environment.
- Ensured data accuracy and integrity across training records; assisted in assessment design and AI curriculum content development.

PROJECTS

EDITH — RAG-based AI Document Q&A System · [AI / ML](#)

Python, Flask, LangChain, REST API | [GitHub](#)

- Built an LLM-powered document analyzer using LangChain's RAG pipeline supporting multi-format document ingestion and context-aware Q&A over a Flask REST API.
- Designed clean endpoints for document upload, query handling, and response streaming; fully deployed and functional.

Traffic Management — Real-Time Distributed Traffic Classifier · [Data Engineering](#)

Python, PySpark, Distributed Computing, Linux/Ubuntu | [GitHub](#)

- Built a real-time traffic classification pipeline using PySpark Streaming; fully developed on Ubuntu Linux from environment setup to job execution.
- Applied distributed computing for scalable, fault-tolerant data processing — complements IBM Spark Fundamentals I & II certification.

Transport Logistics Platform — Full-Stack Load Optimization · [Full-Stack SDE](#)

FastAPI, Uvicorn, MongoDB, React.js, Vite, JWT, OAuth2Bearer | [GitHub](#)

- Full-stack platform enabling truck owners to maximize cargo capacity in both directions of a route; FastAPI backend with JWT/OAuth2 auth and MongoDB storage.
- React.js + Vite frontend deployed on Netlify; FastAPI backend deployed on Render — full split production deployment with bin-packing optimization algorithm for maximum load efficiency.

Adaptive Pathfinding Visualizer — A*, DQN & Hybrid Comparison · [Algorithms / SDE](#)

React.js, Tailwind CSS, JavaScript, Deep Reinforcement Learning | [GitHub](#)

- Interactive React.js visualizer comparing A*, DQN (deep reinforcement learning), and a hybrid approach on static and dynamic hexagonal grids with configurable obstacles.
- DQN agent training loop implemented fully in JavaScript; MIT licensed open-source project.

Reality Check — AI Misinformation & Deepfake Detection Bot · [AI Automation / MLOps](#)

Python, n8n, REST APIs, AI automation | [GitHub](#)

- n8n-based automation platform enabling companies to deploy chatbots in large group chats to fact-check news and detect AI-generated images and videos in real time.
- Modular REST API-driven architecture; finalist project — OIH by DEEP Funding 2025.

Bank Marketing Campaign Analysis Dashboard · [Data Analytics / BI](#)

Power BI, DAX, Data Modeling | [Power BI](#)

- End-to-end Power BI dashboard on a 41,000+ record dataset; KPI cards tracking campaign conversion rates and outcome distributions segmented by age, job, and education.
- One of 12 Power BI dashboards built across a structured BI course — also includes HR Employee Attrition (IBM Watson, 35 KPIs), Retail Sales time-series, and Film Statistics analysis.

HACKATHONS & COMPETITIONS

AI for Bharat 2026 — Finalist — Built and deployed AI application on AWS; national challenge for real-world Indian use cases

FOSS FEST 2025 — Top 15 Internationally — Developed open-source solution on Ubuntu Linux using Odoo ERP

OIH by DEEP Funding 2025 — Finalist — Built Reality Check, AI-powered misinformation and deepfake detection system

Smart India Hackathon 2025 — Cleared internal rounds — India's largest government-backed student hackathon

Code Crusade 2025 — Finalist — Inter-department coding competition, REVA University

LEADERSHIP

Vice President & Tech Lead — FACE (Forum of Aspiring Computer Engineers), REVA University

2024 – Present | *Techno-Cultural Club*

- Lead technical initiatives for a 200+ member CS club; organized coding competitions, tech talks, AI/ML workshops, and open-source events.
- Mentored junior members on software development, data analysis, algorithms, and project building.
- Coordinated cross-functional teams for inter-university hackathons and technical competitions.

EDUCATION

B.Tech in Computer Science Engineering — REVA University, Bangalore

2023 – Present (Expected 2027)

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Statistics, Business Intelligence, Software Engineering

CERTIFICATIONS & PUBLICATIONS

- IBM Spark Fundamentals I (Jan 2026) & II (Feb 2026) — Apache Spark, Big Data Analytics
