EDUCATION

B.Tech in Artificial Intelligence & Data Science — School of CSE, REVA University, Bangalore

Aug 2023 – May 2027 | 2027 Batch | SRN: R23EH115 | CGPA: 7.26 / 10 (6 semesters, no backlogs)

SKILLS

Languages: Python, Java, JavaScript, C++, Scala (Beginner)

AI / ML / CV: LangChain, RAG, Scikit-learn, Pandas, NumPy, OpenCV, MediaPipe, Computer Vision, DQN, Random Forest

Full-Stack: Django, FastAPI, Flask, React.js, Vite, Tailwind CSS, REST APIs, JWT, OAuth2, MongoDB, MySQL, SQL

Data & BI: Power BI (DAX, dashboards) — 12 dashboards built; Advanced Excel, KPI reporting

DevOps & Cloud: Git, GitHub, Docker, AWS, Vercel, Netlify, Render, Linux/Ubuntu, n8n, Agile/SDLC

EXPERIENCE

Junior Intern — REVA Academy for Corporate Excellence (RACE)

May 2025 – Sep 2025 | Bangalore

- Coordinated AI/ML training programs for 100+ professionals across 3+ cohorts; analyzed engagement metrics and prepared weekly/monthly performance reports tracking KPIs.
- Managed LMS platform on Linux; collaborated cross-functionally to deliver AI curriculum on schedule.

PROJECTS

Naruto Jutsu Recognition — Real-Time CV Microservices System · CV / MLOps

Python, FastAPI, MediaPipe, OpenCV, Scikit-learn, Docker, Render | [github.com/SaqibAK001/naruto-cv](#) | [tubular-entremet-fa9842.netlify.app](#)

- Distributed microservices system — API gateway, round-robin load balancer, 2 parallel ML worker nodes — classifying Naruto hand signs via MediaPipe landmark detection in real time. Jutsu Engine detects sign sequences (e.g. Rasengan, Chidori) from a rolling buffer. Dockerized, deployed on Render.

EDITH — LLM-Powered RAG Document Q&A System · AI / LLM

Python, Django, React.js, LangChain, REST API | [github.com/SaqibAK001/EDITH](#) | [edith-six.vercel.app](#)

- Production RAG application — Django backend (Render) + React.js frontend (Vercel); multi-format document ingestion, embedding-based retrieval, and context-aware LLM Q&A.

Transport Logistics Platform — Full-Stack Production App · Full-Stack SDE

React.js, MongoDB, React.js, Vite, JWT, OAuth2Bearer | [github.com/SaqibAK001/TransL](#) | [translwebapp.netlify.app](#)

- End-to-end logistics platform with FastAPI backend (Render) and React.js frontend (Netlify); JWT/OAuth2 auth, bin-packing optimization algorithm, live production deployment.

Adaptive Pathfinding — A*, DQN & Hybrid Visualizer · Algorithms / AI

React.js, JavaScript, Deep Reinforcement Learning | [github.com/SaqibAK001/adaptive-pathfinding](#)

- Interactive React.js tool comparing A*, DQN, and hybrid pathfinding on hexagonal grids — DQN trained in-browser. MIT licensed. Published: Adaptive Pathfinding on Hexagonal Grids using Hybrid A*.

Reality Check — Agentic AI Misinformation & Deepfake Detection · Agentic AI

Python, n8n, LLM APIs, REST APIs | [github.com/SaqibAK001/reality-check](#)

- n8n agentic platform deploying LLM bots in enterprise group chats — autonomously fact-checks news and detects AI-generated media in real time. Finalist — OIH by DEEP Funding 2025.

Bank Marketing Campaign Dashboard · Data Analytics / BI

Power BI, DAX, SQL | [saqibak001.github.io/bi_dashboards](#)

- End-to-end Power BI dashboard on 41,000+ records; one of 12 dashboards built including HR Attrition, Retail Sales, and Film Statistics.

HACKATHONS & COMPETITIONS

AI for Bharat 2026 — Finalist — Deployed an AI application on AWS

FOSS FEST 2025 — Top 15 Internationally — Open-source solution on Ubuntu Linux

OIH by DEEP Funding 2025 — Finalist — Built Reality Check, agentic AI misinformation detection

Smart India Hackathon 2025 — Cleared internal rounds — Government of India initiative

Code Crusade 2025 — Finalist — REVA University inter-department competition

LEADERSHIP

Vice President & Tech Lead — Forum of Aspiring Computer Engineers (FACE), REVA University

Aug 2024 – Present

- Spearheaded technical initiatives for 200+ member AI/CS club; planned coding competitions, workshops, and hackathon teams — managed team of 8 across FOSS FEST 2025 and SIH 2025.

CERTIFICATIONS & PUBLICATIONS

- IBM: Spark Fundamentals I & II · Introduction to Generative AI (Oct 2025) · Prompt Tuning (Oct 2025) · Enterprise Data Science (Dec 2023)
- OpenCV Bootcamp (Apr 2026) | Supervised & Unsupervised ML — Simplilearn (Feb 2026)
- Publications: Adaptive Pathfinding on Hexagonal Grids using Hybrid A* | Blood Work Analysis and Disease Prediction using Random Forest Classifier
